COMMISSIONER FOR PATENTS
WASHINGTON, D.C. 20231

Sir:

Transmitted herewith is/are the following document(s):

1. Request for Certificate of Correction Under 37 C.F.R. §1.322;
2. Certificate of Correction, form PTO-1050 (in duplicate); and
3. Return Receipt Postcard.

If the enclosed papers are considered incomplete, the Mail Room and/or the Application Branch is respectfully requested to contact the undersigned at (617)720-3500, Boston, Massachusetts.

No fee is due. If it is determined that a fee is due, it may be charged to the account of the undersigned, Deposit Account No. 23/2825. A duplicate of this sheet is enclosed.

Respectfully Submitted,
Reuss et al., Applicant

REQUEST FOR ISSUANCE OF CERTIFICATE OF CORRECTION
UNDER 37 C.F.R. §1.322

Dear Sir:

Pursuant to 37 C.F.R. §1.322, Patentee respectfully requests issuance of a Certificate of Correction to correct errors made by the Patent Office in the above-identified issued patent.

Enclosed, in duplicate, is form PTO-1050 with at least one copy being suitable for printing.

It is requested that the errors, noted in the accompanying Certificate of Correction, be corrected. Typographical errors due to a mistake of the Patent and Trademark Office include:

On the title page, item (63) should read as follows:

(63) Continuation of application No. 09/478,776, filed on Jan. 6, 2000, now abandoned.

On the title page, item (75) should read as follows:

(75) Inventors: Stefan Reuss, Rum (AT); David J. Dodge, Williston, VT (US); Ryan Coulter, Morristown, VT (US); Markus Koller, Innsbruck (AT); James D. Laughlin, Burlington, VT (US); Brian West, Burlington, VT (US)

On the title page, item (57) should read as follows:

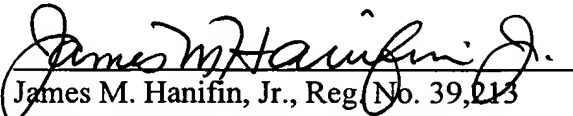

A highback for controlling a gliding board, such as a snowboard, through leg movement of a rider. The highback is comprised of at least two distinct materials with different stiffnesses to achieve a desired blend of stiffness and flexibility. The highback may employ a material of greater stiffness in one or more regions to provide high force transmission between the rider and the board. The highback may employ a material of lesser stiffness in one or more regions where flexibility is desired for more gradual power transmission, comfort and/or to facilitate highback adjustability. The arrangement of the different materials provides a lightweight highback with a relatively sleek profile having selected regions of stiffness and/or flexibility.

In claim 36, column 11, line 20, replace "33" with --35--.

Patentee respectfully requests issuance of the enclosed Certificate of Correction. It is requested that the undersigned be contacted by telephone call at (617) 720-3500 with any questions relating to this Request.

Because the errors appear to be typographical errors made by the U.S. Patent and Trademark Office, no fee is due. If it is determined that a fee is required in connection with this request, please charge Deposit Account No. 23/2825.

Respectfully submitted,
Reuss et al., Applicant

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Title page.

Item [63], should read as follows:

-- [63] Continuation of application No. 09/478,776, filed on Jan. 6, 2000, now abandoned. --

Item [75], should read as follows:

-- [75] Inventors: **Stefan Reuss**, Rum (AT); **David J. Dodge**, Williston, VT (US); **Ryan Coulter**, Morristown, VT (US); **Markus Koller**, Innsbruck (AT); **James D. Laughlin**, Burlington, VT (US); **Brian West**, Burlington, VT (US) --

Item [57], **ABSTRACT**, should read as follows:

-- A highback for controlling a gliding board, such as a snowboard, through leg movement of a rider. The highback is comprised of at least two distinct materials with different stiffnesses to achieve a desired blend of stiffness and flexibility. The highback may employ a material of greater stiffness in one or more regions to provide high force transmission between the rider and the board. The highback may employ a material of lesser stiffness in one or more regions where flexibility is desired for more gradual power transmission, comfort and/or to facilitate highback adjustability. The arrangement of the different materials provides a lightweight highback with a relatively sleek profile having selected regions of stiffness and/or flexibility. --

Column 11.

Line 20, replace "33" with -- 35 --.
